

The Italian Multiple Sclerosis
and Related Disorders Register

The Italian Multiple Sclerosis and Related Disorders Register

started in January 2015

Aims of the initiative

To create an organized multicenter structure to collect data of all Italian MS patients (a near population level)

High-priority areas pertaining to:

- **Public health area:** quality of care, health optimization, social and welfare information, access to healthcare treatments and services.
- **Research area:** epidemiology and prognosis, treatment optimization (effectiveness and safety), rare MS disease forms (PP, POMS), early and preclinical/subclinical disease stages (CIS and RIS).

RISM - Infrastructure Organization

Executive Committee:
*responsible for the overall
direction of the study.*

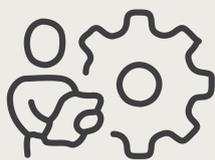

Scientific Committee:
*oversees the scientific
initiatives.*

Centers Committee:
*includes the principal
investigators of each center.*

Stakeholder Advisory Board:
*to meet the strategic priorities
of the RISM, relevant
stakeholders are engaged
with an advisory forum.*

**Technical and Methodological
Structure:** *responsible for
the technical-operational
coordination of the study.*

**Technical and Administrative
Infrastructure:**
